

Kansas City, Kansas Public Library MobilePrint Instructions

MobilePrint, or wireless printing, is now working MAIN, SOUTH, TURNER, and WEST.

Submit your print job to the print queue for the branch and printer you want to use, and then pay for the print at the library, like you would when printing from the public lab.

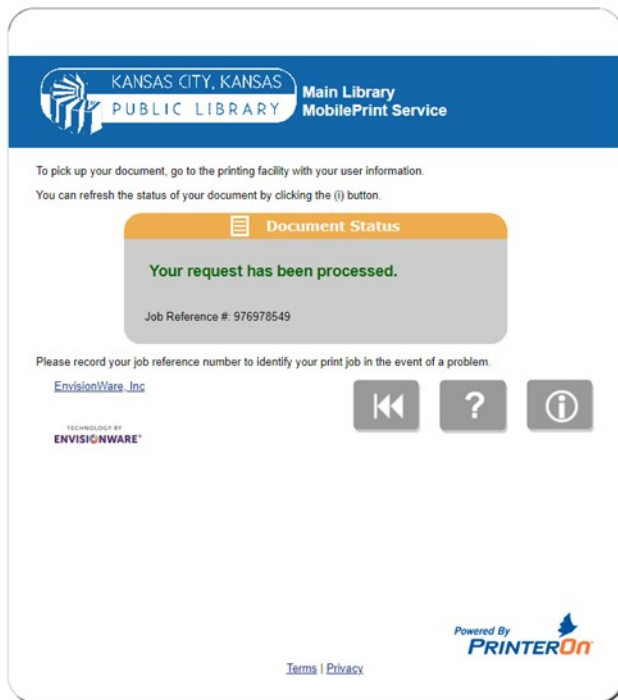

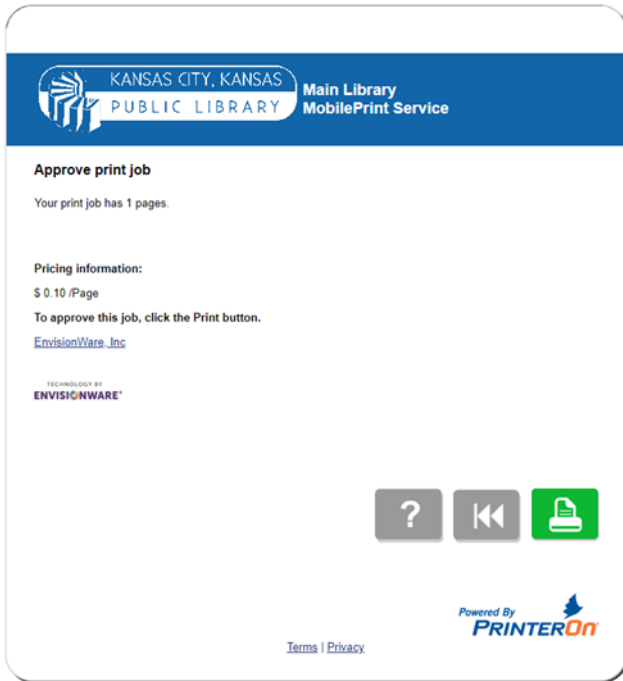

In addition, you can use a web portal for the branch: select a printer type (black and white or color), enter your email address (for your position in the printer queue) and upload your document to print. You can then go to the library branch to pay for and retrieve your document.

<http://www.printeron.net/kckpl/main>
<http://www.printeron.net/kckpl/south>
<http://www.printeron.net/kckpl/turner>
<http://www.printeron.net/kckpl/west>

Enter your information, as in the example below, and click on the right-hand triangle to proceed:

A screenshot of the Kansas City, Kansas Public Library MobilePrint Service web portal. The page has a blue header with the library logo and name. Below the header, there is a welcome message and the library's address. The main content area is divided into three columns: "Printer", "User Info", and "Select Document". The "Printer" column has radio buttons for "Black and White" (selected) and "Color", and a "Details" button. The "User Info" column has an "Email address:" label and a text input field containing "bmccoy@kckpl.org", followed by explanatory text. The "Select Document" column has a "File or URL:" label, a text input field containing "KCKPL.org.jpg", a "Browse..." button, and explanatory text. At the bottom left, there are three links with icons: "How do I print from a mobile device?", "How do I print a boarding pass?", and "What types of files can I print?". At the bottom center, there are three buttons: a question mark, a close (X) button, and a right-pointing triangle (submit button).

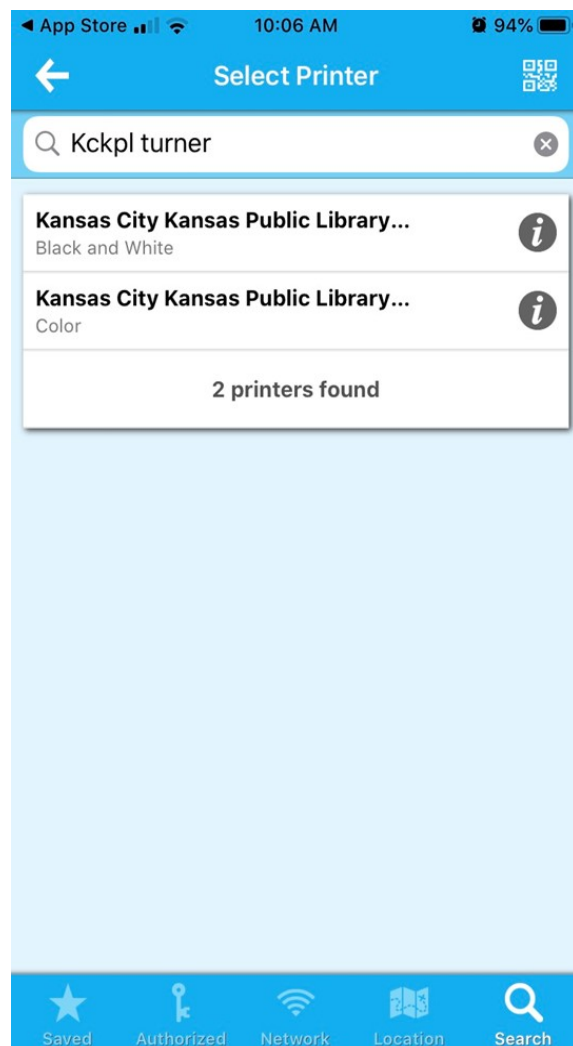

The program will then count the number of pages you are printing and show you the cost per page, and you can click the image of the printer to actually submit the print job:

This screen will show you the processing of your request. You can get updated information by pressing the circled "i" in the lower-right.

If you have an Android or Apple device, you might want to use the apps, which are available from the respective online stores. Look for the PrinterOn application and install it.

Click on the printer selection button at the bottom of the app and search for KCKPL [branch] to find the printers available. Searching for KCKPL MAIN on Android looks as below on the left, while searching for KCKPL Turner on an Apple device looks very much the same.

Click on which printer you want to use, select your document, click on the PRINT icon, enter your email address, and your document's on the way to the print queue for you to pick up at the library! It will take a minute or two to process the document and actually send it on the way.

What type of files can I print?

- Microsoft Word for Windows or Mac 2000-2019
- Microsoft Excel for Windows or Mac 2000-2019
- Microsoft PowerPoint for Windows or Mac 2000-2019
- Microsoft Visio 2000-2019
- Apache OpenOffice/LibreOffice Writer 2.x and later
- Apache OpenOffice/LibreOffice Calc 2.x and later
- Apache OpenOffice/LibreOffice Impress 2.x and later
- Apache OpenOffice/LibreOffice Draw 2.x and later
