

Materials

- 3 flat-back clear marbles
- 3 strong magnets
- E6000 glue
- Flower & mermaid tail shapes
- Glitter (optional)

Instructions

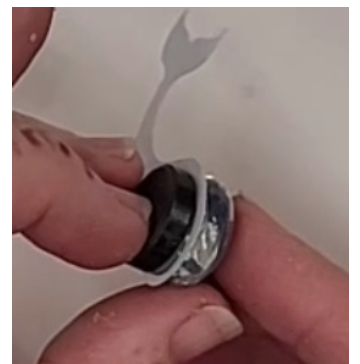

Open the glue tube and use the puncture tool on the back of the lid to break the seal.

If you want to use glitter, apply a thin layer of glue to wherever you want the glitter. Sprinkle the glitter over the glue & tap off any excess. It is best to work on a piece of paper to avoid making a mess. **Do this step before you glue the marble.**

For mermaid tails:

Glue the marble to the rounded end of the tail. Glue the magnet to the back, directly under the marble. Let dry for at least of few hours before using the magnet.

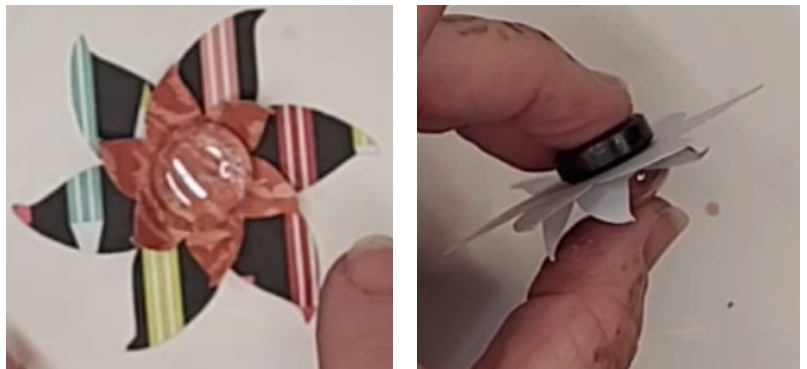

For flowers:

Glue the marble into the center of one of the SMALL flower pieces. Gently curve the petals up around the marble to make them stand up a bit. This will give a 3D effect to your flower.

Glue the marble and small flower piece into the center of a large piece. Then glue a magnet onto the back.

Let dry for at least a few hours before using the magnet.
