

# Materials

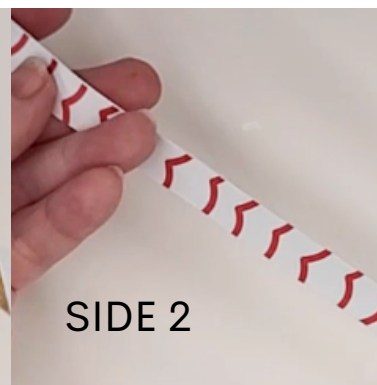

12" pieces of scrapbook paper,  
cut 1/2" wide  
glue stick

You will need a pair of scissors.

# Instructions

Choose 8 strips of paper. Glue pairs of them back to back, being careful to line up the edges. You should end up with 4 strips with patterns on each side.

Take 2 of the strips. Glue the ends together at a 90 degree angle. Line the small edges up with the outside edge of the other strip, as shown in the images below.

Glue the other 2 strips at right angles as shown below.

Take the strip on the right. Fold it over so the outside edge meets the inside edge of the strip on the left. Crease the fold to make it nice and flat.

Take the strip on the outside left and fold it over the same way. Repeat, alternating left and right until you get to the bottom.

Glue all of the end pieces down where they cross over each other. Trim off excess strip ends to form a nice point.
